

Prof. Dr. Eleni P. Kalogianni is a Professor in the Department of Food Science and Technology, School of Geosciences, International Hellenic University (I.H.U.). She is vice President of the European Federation for the Science and Technology of Lipids and national representative to the same organization. She specializes in food science and technology with a specific focus on the processing and characterization of lipid systems, and on the study of multiphase systems and interfacial properties. She has a research experience of over 20 years and has been the coordinator/head of a series of competitive research projects funded by Greek, European and private grants. Her current projects focus on the extraction technology and characterization of lipids issuing from non-conventional resources and on the technology and characterization of emulsions. She is the owner and inventor on one USPTO Patent. She has 50 publications in peer-reviewed SCI indexed scientific journals (Scopus h-index:17) and over 70 presentations in peer-reviewed international and national conferences. She has organized and chaired scientific conferences and one-day seminars and in April 2024 the 19<sup>th</sup> Food Colloids Conference. She has been head of the Food Science and Technology department for 2021-2023, a member of the I.H.U. Research Committee, academic director of the Quality Office of A.T.E.I.Th. (now I.H.U.). She represents I.H.U. in the Greek Technological Platform “Food for Life” (member of the European Platform) and coordinates the working group “Sustainable food production” under the aegis of the Federation of Hellenic Food Industries.
